*\*The "charitable gift amount" represents the present value of the anticipated future charitable gift. Assuming an annual growth rate of 4.5% over the life expectancy of the annuitant (set by the Internal Revenue Service), the "charitable gift amount" would be approximately 50% of the amount of the initial gift. This charitable gift amount will depend upon the annuitant's age and ACGA life expectancy and is conditioned on the 10-year Treasury Rate at the time of issuance. PCF does not give tax advice please see your CPA if you have any questions.*
